## **Background Information**

Angiomotin-like 2 (AMOTL2) is a member of the motin family of angiostatin-binding proteins. The motin family, also known as AMOTs, consists of three members: AMOT, AMOT-like 1 (AMOTL1) and AMOTL2. Members of the motin family are a type of adaptor proteins mainly distributed in the cytomembrane, cytoplasm or nucleus, and have a higher expression in the endothelial cells of capillaries and in larger vessels of the placenta. Human AmotL2 encodes two isoforms of a molecular mass of 100 kDa and 60 kDa.(PMID: 34036399,PMID: 25080976)

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 68401-1-lg (AMOTL2 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (-20°C Methanol) fixed A549 cells using AMOTL2 antibody (68401-1-Ig, Clone: 2C4A4) at dilution of 1:1000 and CoraLite®488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L).
