## Mesothelin Recombinant antibody

Catalog Number:83744-6-RR

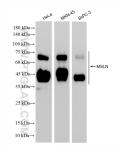

Basic Information	Catalog Number: 83744-6-RR	GenBank Accession Number: NM_005823	Purification Method: Protein A purfication	
	Size:	GenelD (NCBI):	CloneNo.:	
	100ul , Concentration: 1000 ug/ml by Nanodrop; Source: Rabbit Isotype: IgG	10232	240795B12	
		UNIPROT ID:	Recommended Dilutions:	
		Q13421 Full Name:	WB 1:5000-1:50000	
				mesothelin
		Calculated MW: 69KD		
		Observed MW: 40 kDa, 69 kDa		
		Applications	Tested Applications:	Positive C
WB, ELISA	WB : HeLa		WB: HeLa cells, MKN-45 cells, BxPC-3 cells	
Species Specificity:				
	human			
	Mesothelin (MSLN) is a 40kDa GPI-anchored surface glycoprotein that is expressed on pleural and peritoneal mesothelial cells, but not in other non-neoplastic tissues. The mesothelin gene encodes a 69-71kDa precursor protein that is processed to a 40kDa membrane-bound protein termed mesothelin and a 31kDa shed fragment called megakaryocyte-potentiating factor (MPF) that is released from the cell. Mesothelin is a tumor differentiation antigen present at low levels on a restricted set of normal adult tissues (e.g. mesothelium), and is expressed at high levels in mesotheliomas, as well as ovarian, pancreatic, and lung cancers. Mesothelin may be a new target for immunotherapy (PMID: 20922056, 18691948, 15217923).

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 83744-6-RR (MSLN antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.
