

For Research Use Only

Phospho-YBX1 (Ser102) Recombinant monoclonal antibody, PBS Only

Catalog Number: 84993-5-PBS

Basic Information

Catalog Number:

84993-5-PBS

Size:

100ug, Concentration: 1 mg/ml by Nanodrop;

Source:

Rabbit

Isotype:

IgG

GenBank Accession Number:

BC010430

GeneID (NCBI):

4904

UNIPROT ID:

P67809

Full Name:

Y box binding protein 1

Calculated MW:

324 aa, 36 kDa

Observed MW:

49 kDa

Purification Method:

Protein A purification

CloneNo.:

242449G4

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human

Background Information

YBX1, also known as Y-box binding protein 1, is a multifunctional DNA- and RNA-binding protein and transcription factor that plays a crucial role in various cellular processes, including gene expression, RNA metabolism, and cellular stress response. The phosphorylation of YBX1 at serine 102 (Ser102) is a key post-translational modification that significantly impacts its function and localization within the cell. (PMID: 34680946)

Storage

Storage:

Store at -80°C.

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

MCF-7 and HepG2 cell lysates were subjected to SDS PAGE followed by western blot with 84993-5-RR (Phospho-YBX1 (Ser102) antibody) blocked with BSA only and Phospho-YBX1 (Ser102) peptide at dilution of 1:2000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 84993-5-PBS in a different storage buffer formulation.
