Background Information

C-Type Lectin Domain Family 3 Member B (CLEC3B) is a transmembrane Ca²⁺-binding protein, locating in cell plasma, extracellular matrix and exosomes. Downregulation of CLEC3B has been reported in various diseases. It was demonstrated in CLEC3B-deficient mice that the absence of CLEC3B impeded the mineralization process in osteogenesis. Selected Validation Data

Human plasma were subjected to SDS PAGE followed by western blot with 85689-5-RR (Tetranectin antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 85689-5-PBS in a different storage buffer formulation.
