

For Research Use Only

EVI2B Recombinant antibody, PBS Only

Catalog Number: 85943-1-PBS

Basic Information

Catalog Number: 85943-1-PBS	GenBank Accession Number: BC005926	Purification Method: Protein A purification
Size: 100ug, Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 2124	CloneNo.: 250344C9
Source: Rabbit	UNIPROT ID: P34910	
Isotype: IgG	Full Name: ecotropic viral integration site 2B	
Immunogen Catalog Number: EG3709	Calculated MW: 448 aa, 49 kDa	
	Observed MW: 60 kDa	

Applications

Tested Applications:
WB, IF/ICC, Indirect ELISA

Species Specificity:
human

Background Information

Ecotropic viral integration site 2B protein (EVI2B) is a type I transmembrane protein embedded within intron 27b of the neurofibromatosis type 1 (NF1) gene. It is transcribed in the opposite direction to the NF1 gene (PMID: 37584733). EVI2B is a downstream target of CCAAT/enhancer binding protein alpha (C/EBPα), which is crucial for myeloid differentiation and the function of hematopoietic progenitors (PMID: 36830696). This protein is highly expressed in mature granulocytes and is involved in the regulation of immune cell maturation (PMID: 28186500).

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 85943-1-RR (EVI2B antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 85943-1-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (4% PFA) fixed THP-1 cells using EVI2B antibody (85943-1-RR, Clone: 250344C9) at dilution of 1:400 and CoraLite® 488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2). This data was developed using the same antibody clone with 85943-1-PBS in a different storage buffer formulation.
