## For Research Use Only

## Cyclophilin E Recombinant antibody, PBS Only

Catalog Number:85952-1-PBS

**Basic Information** 

Catalog Number: 85952-1-PBS

Rabbit

GenBank Accession Number:

BC004898

GeneID (NCBI):

Full Name:

100ug, Concentration: 1 mg/ml by 10450

Nanodrop: **UNIPROT ID:** Q9UNP9

Isotype: peptidylprolyl isomerase E

IgG (cyclophilin E) Immunogen Catalog Number: Calculated MW: AG7603 33 kDa

> Observed MW: 33 kDa

**Purification Method:** Protein A purification

CloneNo.: 250296A6

**Applications** 

**Tested Applications:** 

Species Specificity:

WB, Indirect ELISA

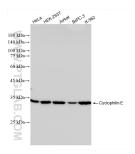

**Background Information** 

Cyclophilin E (CypE), also known as Cyclophilin-33, Rotamase E, CYP33, PPIE, is an enzyme which belongs to the cyclophilin-type PPIase family of PPIase E subfamily (PMID: 15998457). Cyclophilin E negatively regulates influenza virus replication and transcription occurs by impairing the formation of the vRNP (PMID: 21887220). Additionally, Cyclophilin E plays an important role in osteoblast differentiation as a positive regulator by increasing the transcriptional activity of Runx2 (PMID: 37947627).

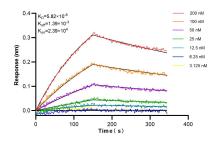

Storage

Storage: Store at -80°C. Storage Buffer: PBS only, pH7.3

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 85952-1-RR (Cyclophilin E antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 85952-1-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 85952-1-RR against Human Cyclophilin E were performed. The affinity constant is 58.2 nM.
