## For Research Use Only

## AIF Recombinant antibody, PBS Only (Detector)

Catalog Number:86156-4-PBS

**Purification Method:** 

CloneNo.:

250772B4

Protein A purification

**Basic Information** 

Catalog Number: GenBank Accession Number:

86156-4-PBS BC111065

GeneID (NCBI):

100ug, Concentration: 1 mg/ml by

Nanodrop: **UNIPROT ID:** 095831 Rabbit Full Name:

Isotype: apoptosis-inducing factor, mitochondrion-associated, 1 IgG

Immunogen Catalog Number: Calculated MW: 609 aa, 66 kDa AG13268

**Applications** 

**Tested Applications:** 

Sandwich ELISA, Indirect ELISA, Sample test

Species Specificity:

**Product Information** 

86156-4-PBS targets AIF as part of a matched antibody pair:

MP02287-2: 86156-2-PBS capture and 86156-4-PBS detection (validated in Sandwich ELISA)

Unconjugated rabbit recombinant monoclonal antibody in PBS only (BSA and azide free) storage buffer at a concentration of 1 mg/mL, ready for conjugation. Created using Proteintech's proprietary in-house recombinant technology. Recombinant production enables unrivalled batch-to-batch consistency, easy scale-up, and future security of supply.

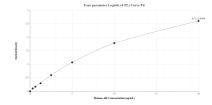

This conjugation ready format makes antibodies ideal for use in many applications including: ELISAs, multiplex assays requiring matched pairs, mass cytometry, and multiplex imaging applications. Antibody use should be optimized by the end user for each application and assay.

Storage

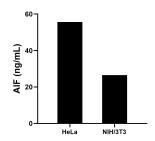

Storage: Store at -80°C.

Storage Buffer: PBS only, pH7.3

## **Selected Validation Data**

Sandwich ELISA standard curve of MP02287-2, Human AIF Recombinant Matched Antibody Pair -PBS only. 86156-2-PBS was coated to a plate as the capture antibody and incubated with serial dilutions of standard Ag13268. 86156-4-PBS was HRP conjugated as the detection antibody. Range: 0.313-20 ng/mL

The mean AIF concentration was determined to be 55.63 ng/mL in HeLa cell extract based on a 2.10 mg/mL extract load and 26.49 ng/mL in NIH/3T3 cell extract based on a 1.40 mg/mL extract load.
