

For Research Use Only

EPHX2 Recombinant monoclonal antibody, PBS Only

Catalog Number:86790-1-PBS

Basic Information

Catalog Number: 86790-1-PBS	GenBank Accession Number: BC013874	Purification Method: Protein A purification
Size: 100ug , Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 2053	CloneNo.: 251753F4
Source: Rabbit	UNIPROT ID: P34913	
Isotype: IgG	Full Name: epoxide hydrolase 2, cytoplasmic	
Immunogen Catalog Number: AG1283	Calculated MW: 63 kDa	
	Observed MW: 57 kDa	

Applications

Tested Applications:
WB, IP, Indirect ELISA

Species Specificity:
human, mouse

Background Information

EPHX2(Epoxide hydrolase 2) acts on epoxides (alkene oxides, oxiranes) and arene oxides and plays a role in xenobiotic metabolism by degrading potentially toxic epoxides. A number of single nucleotide polymorphisms (SNPs) in human EPHX2 have been linked to cardiovascular disease risk, including increased risk of coronary heart disease, hyperlipoproteinemia, and type-2 diabetes (PMID: 14732757, 16595607, 14673705, 15845398, 17460077). It was observed in many tissues with the band of 63 kDa in the western blot. It has also been reported that the N-terminal domain might promote dimerization of EPHX2 (PMID:21553642). Negative expression of EPHX2 protein in U-937 cells is consistent with the predicted expression pattern.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS only, pH7.3

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 86790-1-RR (EPHX2 antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 86790-1-PBS in a different storage buffer formulation.

IP result of anti-EPHX2 (IP:86790-1-RR, 4ug; Detection:86790-1-RR 1:600) with mouse colon tissue lysate 1480 ug. This data was developed using the same antibody clone with 86790-1-PBS in a different storage buffer formulation.

Bi-layer interferometry (BLI) kinetic assays of 86790-1-RR against Human EPHX2 were performed. The affinity constant is below 1 pM.
