

For Research Use Only

MCM6 Recombinant monoclonal antibody, PBS Only

Catalog Number: 86950-1-PBS

Basic Information

Catalog Number: 86950-1-PBS	GenBank Accession Number: BC032374	Purification Method: Protein A purification
Size: 100ug , Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 4175	CloneNo.: 251235A8
Source: Rabbit	UNIPROT ID: Q14566	
Isotype: IgG	Full Name: minichromosome maintenance complex component 6	
Immunogen Catalog Number: AG4180	Calculated MW: 821 aa, 93 kDa	
	Observed MW: 105 kDa	

Applications

Tested Applications:
WB, IHC, IF/ICC, Indirect ELISA

Species Specificity:
human

Background Information

The MCM genes were firstly identified in yeast defective in minichromosome maintenance and have since been shown to have roles in the progression of the cell cycle, and most of them are cell division control genes [PMID: 18096807]. MCM2-7 complex are suggested to be 'DNA licensing factors' which bind to the DNA after mitosis and enable DNA replication before being removed during S phase. Mini-chromosome maintenance 6 (MCM6) is one component of the MCM2-7 complex which is the putative replicative helicase essential for 'once per cell cycle' DNA replication initiation and elongation in eukaryotic cells [PMID: 9305914]. MCM6 single subunit forms homohexamer and contains an ATP-dependent and replication fork stimulated 3' to 5' DNA unwinding activity along with intrinsic DNA-dependent ATPase and ATP-binding activities [PMID: 21336027]. The calculated molecular weight of MCM6 is 92 kDa, but the modified MCM6 is about 105 kDa.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS only, pH7.3

For technical support and original validation data for this product please contact:

E: proteintech@ptglab.com
W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 86950-1-RR (MCM6 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 86950-1-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 86950-1-RR against Human MCM6 were performed. The affinity constant is below 1 pM.
