## Background Information

MUC15 is a transmembrane mucin that is ubiquitously expressed on the surface of epithelial cells as a membrane-bound glycoprotein. MUC15 plays a dual role in cellular processes, participating in cell adhesion, signal transduction, and regulating receptor tyrosine kinase activity. Its expression is frequently altered in various cancers, acting as a context-dependent tumor suppressor or promoter. (PMID: 32479243;16904320; 30420637)

## Selected Validation Data

ACHN cells were subjected to SDS PAGE followed by western blot with 86987-1-RR (MUC15 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.

Biolayer interferometry (BLI) kinetic assays of 86987-1-RR against Human MUC15 were performed. The affinity constant is 5.51 nM.
