

For Research Use Only

TRPM4 Recombinant monoclonal antibody, PBS Only

Catalog Number: 87085-1-PBS

Basic Information

Catalog Number: 87085-1-PBS	GenBank Accession Number: BC132727	Purification Method: Protein A purification
Size: 100ug, Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 54795	CloneNo.: 250968D6
Source: Rabbit	UNIPROT ID: Q8TD43	
Isotype: IgG	Full Name: transient receptor potential cation channel, subfamily M, member 4	
	Calculated MW: 1214 aa, 134 kDa	
	Observed MW: 130-150 kDa	

Applications

Tested Applications:
WB, IHC, Indirect ELISA

Species Specificity:
human

Background Information

TRPM4 is a Calcium-activated nonselective cation channel. It is activated by increase in intracellular Ca²⁺, mediates transport of monovalent cations (Na⁺ > K⁺ > Cs⁺ > Li⁺), leading to depolarize the membrane. It thereby plays a central role in cardiomyocytes, neurons from entorhinal cortex, dorsal root and vomeronasal neurons, endocrine pancreas cells, kidney epithelial cells, cochlea hair cells etc. TRPM4 participates in T-cell activation by modulating Ca²⁺ oscillations after T lymphocyte activation, which is required for NFAT-dependent IL2 production. It's also involved in myogenic constriction of cerebral arteries.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS only, pH7.3

For technical support and original validation data for this product please contact:

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

HEK-293 cell lysates (100°C treated and 37°C) were subjected to SDS PAGE followed by western blot with 87085-1-RR (TRPM4 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 87085-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded human colon tissue slide using 87085-1-RR (TRPM4 antibody) at dilution of 1:1000 (under 20x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 87085-1-PBS in a different storage buffer formulation.
