For Research Use Only

Anti-Human CD155/PVR Rabbit Recombinant Antibody

Catalog Number: 98186-1-RR

Purification Method:

Protein A purfication

CloneNo.:

241405G8

Basic Information

Catalog Number:

98186-1-RR

Size:

100ug , 1000 $\mu g/ml$

Source: Rabbit Isotype:

GenBank Accession Number:

BC015542 GeneID (NCBI):

5817

Full Name:

UNIPROT ID: P15151

poliovirus receptor

Calculated MW: 45 kDa

Applications

Tested Applications:

Species Specificity:

human

Background Information

CD155, also known as PVR, is a type I transmembrane glycoprotein in the immunoglobulin superfamily. It contains the immunoglobulin superfamily is a containst the immunoglobulin superfamily of the containst the immunoglobulin superfamily. It contains the immunoglobulin superfamily is a contain the immunoglobulin superfamily. It contains the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily. It contains the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily. It contains the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily in the immunoglobulin superfamily in the immunoglobulin superfamily superfamily in the immunoglobulin superfamily in the immunoglobulin superfamily superthree extracellular immunoglobulin-like domains, D1-D3, of which D1 is recognized by the virus. Mature human CD155 consists of a 323 amino acid extracellular domain with one N-terminal V-type and two C2-type Ig-like domains, a 24 amino acid transmembrane segment, and a 50 amino acid cytoplasmic tail. CD155 is thought to play a role in adhesion by interaction with the ECM component vitronectin as well as a role in NK killing of tumor cells. CD155 binds to two receptors of NK cells, CD96 and CD226, and accumulates at cell-cell contact sites, leading to the formation of mature immune synapses between NK cells and target cells. CD155 serves as the entry receptor for poliovirus and thereby mediates human susceptibility to poliovirus infection.

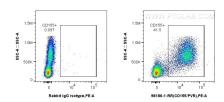

Storage

Store at 2 - 8°C. Stable for one year after shipment.

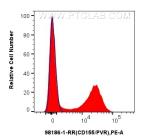

Storage Buffer:

PBS with 0.09% sodium azide, pH 7.3.

Selected Validation Data

1x10^6 human PBMCs were surface stained with 0.25 ug Anti-Human CD155/PVR Rabbit Recombinant Antibody (98186-1-RR, Clone: 241405G8) or Rabbit IgG Isotype Control Recombinant Antibody (98136-1-RR, Clone: 240953C9), and PE-Conjugated Goat Anti-Rabbit IgG(H+L). Cells were incubated with FC Receptor Block prior to staining. Cells were not fixed.

1x10^6 human PBMCs were surface stained with 0.25 ug Anti-Human CD155/PVR Rabbit Recombinant Antibody (98186-1-RR, Clone: 241405G8) (red) or Rabbit IgG Isotype Control Recombinant Antibody (98136-1-RR, Clone: 240953C9) (blue), and PE-Conjugated Goat Anti-Rabbit IgG(H+L). Cells were incubated with FC Receptor Block prior to staining. Cells were not fixed.
