## FcZero-rAb™ APC Anti-Human CD89 Rabbit Recombinant Antibody

Catalog Number: APC-FcA98105

**Basic Information** 

Catalog Number:

GenBank Accession Number:

**Purification Method:** 

APC-FcA98105 Size:

BC027953 GeneID (NCBI): Protein A purification

100tests, 5 ul/test

2204

CloneNo.: 241426E3

650 nm / 660 nm

Source:

Full Name:

Excitation/Emission maxima

Rabbit

Fc fragment of IgA, receptor for

wavelengths:

Isotype: IgG

Calculated MW: 287 aa, 32 kDa

**Applications** 

**Tested Applications:** 

Species Specificity:

human

**Background Information** 

FcaRI (CD89) is a member of the Fc receptor immunoglobulin superfamily, constitutively expressed on cells of the myeloid lineage like neutrophils, eosinophils, monocytes macrophages, and platelets (PMID: 28103138). CD89 expression and activation are increased in human blood phagocytes following bacterial infection, together with increased expression and association of FcRy with CD89 (PMID: 34756952). CD89 binds both subclasses of IgA (IgA1 and IgA2) with moderate affinity, but also binds other molecules such as TfR1, C-reactive protein and bacterial ligands. CD89 represents an effective target molecule for immunotherapy mediated by bispecific antibodies (PMID: 37081893).

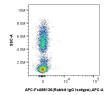

Storage

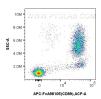

Storage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 0.09% sodium azide and 0.5% BSA.

## Selected Validation Data

1x10^6 human peripheral blood leukocytes were surface stained with 5 ul APC Anti-Human CD89 Rabbit RecAb (APC-FcA98105, Clone:241426E3) or APC Rabbit IgG Isotype Control RecAb (APC-FcA98136, Clone: 240953C9). Cells were not fixed.
