| and Storage              | Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-term<br>storage.<br>After reconstitution with sterile water, if glycerol has no effect<br>on subsequent experiments, it is recommended to add an<br>equal volume of glycerol for long-term storage (see Stability<br>and Storage for more details).<br>If a different concentration is needed for your purposes please<br>adjust the reconstitution volume as required (please note: the<br>ion concentration of the final solution will vary according to<br>the volume used).<br>Note: Centrifuge vial before opening. When reconstituting,<br>gently pipet and wash down the sides of the vial to ensure full<br>recovery of the protein into solution. | The product is shipped at ambient temperature.<br>Upon receipt, store it immediately at the<br>recommended temperature (see below). |
| Purity                   | 80%, by SDS-PAGE with Coomassie Brilliant Blue staining.  |   |
| Formulation              | The purified protein was Lyophilized from sterile PBS (58mM Na2HPO4,17mM NaH2PO4, 68mM NaCl, pH8.). 5 %<br>trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 100mM GSH.  |   |
| Stability and Storage    | Store for up to 12 months at -20°C to -80°C as lyophilized powder.  |   |
