Please contact the lab for more information Reconstitution and Storage Reconstitution Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-term storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Sability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstitution recovery of the protein into solution. Note: Centrifuge vial before opening. When reconstitution vial gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. Short PAGE Storage of Reconstituted Protein was Lyophilized from sterile PBS (58mM Na2HPO4, 17mM NaH2PO4, 68mM NaCL, pH7.4). 5 % trehalose and 5 % mannitol are added as protectant before Lyophilization. The elution buffer contain 300mM imidazole. Storage of Reconstituted Protein Short Term Storage: Store for up to 12 months at -20°C to -80°C as Lyophilized powder. Storage of Reconstituted Protein Short Term Storage: Store at 2.8°C for (1-2 week); Long Term Storage: Store at 2.8°C for (1-2 week); Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.				
and Storage Reconstitute at 0.25 g/µ in 200 µ isterile water for short-term storage. The product is shipped at ambient temperature and subsequent experiments, it is recommended to add an equal volume of grycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution will way according to the volume used). Note: Centrifuge vial before opening. When reconstituting, genty pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. The product is shipped at ambient temperature (see below). Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Formulation The purified protein was Lyophilized from sterile PBS (SBmM Na2HPO4, 17mM NaH2PO4, 68mM NaCl, pH7.4), 5 % trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 300mM imidazole. Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Store at 2-8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.				
and Storage Reconstitute at 0.25 g/µ in 200 µ isterile water for short-term storage. The product is shipped at ambient temperature and subsequent experiments, it is recommended to add an equal volume of grycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution will way according to the volume used). Note: Centrifuge vial before opening. When reconstituting, genty pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. The product is shipped at ambient temperature (see below). Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Formulation The purified protein was Lyophilized from sterile PBS (SBmM Na2HPO4, 17mM NaH2PO4, 68mM NaCl, pH7.4), 5 % trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 300mM imidazole. Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Store at 2-8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.	Reconstitution			
After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-terms storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Formulation The purified protein was Lyophilized from sterile PBS (58mM Na2HPO4, 17mM NaH2PO4, 68mM NaCL, pH7.4). 5 % trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 300mM imidazole. Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Short Tem Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.	and Storage			
on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note:: Centrifice vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Formulation The purified protein was Lyophilized from sterile PBS (S8mM Na2HPO4,17mM NaH2PO4, 68mM NaCl, pH7.4). 5 % trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 300mM imidazole. Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Store at 2.8°C for (1-2 weeks). Long Term Storage: Store at 2.8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.		-
