FOR IN VITRO RESEARCH USE ONLY. NOT FOR USE IN HUMANS OR ANIMALS.

Recombinant human C1orf83 protein

Ag15300 MORVIETPRONSPORDSCOMVEXALLEDGE Form: VERDING MICRATELEDGE STANKARDELEDGE STANKARDEL	Basic Information	Catalog Number:	Peptide Sequence:
Available lyophilized USTRGHTVMMRRISDSEVAGLABEVYTEWG Species: Human Expression Source: VentERTFHLCSRUMGYNRTVRALVTLKHRA Construction: Expression Source: e. odl-derived RCR4L7, with N-terminal GST. Biological Activity: Not tested Hodotokin Level: Please contact the lab for more information Shipping: The dotokin Level: Please contact the lab for more information After constitution: Reconstitution with stelle water for short-term storage After commended to accommende			
Species: human VENERETFICE.SELINGPRETVEX.VETUGEALY (1-208 as encoded by BC035374) Expression Source: e call-derived, PGEX-47, with N-terminal CST. Biological Activity: Not tested Biological Activity: Not tested Endocesial Activity: Not tested Shipping: Please constitution: and Storage Reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol. For long-term storage (see Sability and Storage for more details). Shipping: The product is shipped at ambient temperature (see below). Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Shipping: The product is shipped at ambient temperature (see below). Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Shipping: The product is shipped at ambient temperature (see below). Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Storage of terviolume used). Stability and Storage Store for up to 12 months at - 20°C to -80°C as lyophilized powder. Stability and Storage Store for up to 12 months at - 20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Store at -28°C to rup to 3 months, reconstitution with sterile water and addition of a equal volume of glycerol. Avoid repart freeze-thaw cycles.			
Expression Source: e cdlderived, PCEV-41, with N-terminal GST. Biological Activity: Not tested Endotoxin Level: Please contact the lab for more information Reconstitution Reconstitution with sterile water for short-term storage. Shipping: The product is shipped at ambient temperature storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to ad an equal volume of glycerol for long-term storage (see Sability and Storage for more details). If a different concentration is needed for your purpose please note: the almost studie water of the vial to ensure full recommended to ad an equal volume of glycerol for long-term storage (see Sability and Storage for more details). Shipping: Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Shipping: Formulation The purified protein was Lyophilized from sterile PBS (SBmM Na2HPO4.17mM NaH2PO4.68mMNaCl, pH8), 5 % trebalse and 3% mannitol are added as protectant before lyophilization. The elution buffer contain 100MM CSH. Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Shot Term Storage: Soure at -20°C to -80°C for up to 3 months, reconstitution of up the storage and 3% mannitol are added as protectant before lyophilized powder.			
e cdi-derived, PCEX-4T, with N-terminal CST. Biological Activity: Biological Activity: Not tested Reconstitution and Storage Reconstitute at 0.25 gp(Juli 200 µl sterile water for short-term storage. Shipping: The product is shipped at a mbient temperatur (up on recipt, store it immediately at the recommended temperature (see below). After reconstitution out this storage adjust the reconstitution value as arguined (please notes the ion consensume superiments), it is recommended to add an equal value of glycerol for long-term storage (see Stability and Storage for more details). The product is shipped at a mbient temperatur (up on recipt, store it immediately at the recommended temperature (see below). Purity B5%, by SDS-PAGE with Coomassie Brilliant Blue staining. The purified protein into solution. Form ulation The purified protein was Lyophilized from sterile PBS (SBM Na2HPO4,17mM NaH2PO4, 68m NaCL, pH8), 5 % trebalse and 5 % marnitul are added as protectant before lyophilization. The elution buffer contain 100M CSH. Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilization. The elution buffer contain 100M CSH. Storage of Reconstituted Protein Shot Term Storage: Store at 2.8°C for (12 weeks). Long Term Storage: Store at 2.8°C for			
Not rested Endotsini Level: Please contact the lab for more information Reconstitution Reconstitution and Storage Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-terms storage. Shipping: After reconstitution with sterile water, if glycerol has no effect on subsequent experiments; it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration with sterile water, if glycerol has no effect on subsequent experiments; it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). Shipping: The product is shipped at ambient temperature (see below). Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. The purified protein into solution. The purified protein into solution. Formulation The purified protein was Lyophilized from sterile PBS (SBM Na2HPO4, 137m NaH2PO4, 68m NACL, pH8), 5 % trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 100m MGSH. Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Norti Storage: Store at 2-8°C for (1-2 weeks). Large term Storage: Aligotar and store at 2-8°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal would with sterile water and addition of an equal would with sterile water and addition of an equal would with sterile water and addition of an equal would with steril			
Please contact the lab for more information Reconstitution and Storage Reconstitution: Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-term storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. Shipping: The product see below). Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Shipping: The product see and 5% mannitol are added as protectant before [yophilized from sterile PBS (SBm Na2HPO4, 17m NaH2PO4, 6Bm M NaCL, pH8), 5% trehalose and 5% mannitol are added as protectant before [yophilized powder. Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Short Term Storage: Aliguot and store at -20°C to -80°C for up to 3 months, reconstituted on set -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.			
and Storage Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-term storage. The product is shipped at ambient temperatu your receipt your based of the sterile water for short-term and Storage for more details). The product is shipped at ambient temperatu your receipt your based of the sterile water for short-term and Storage for more details). The product is shipped at ambient temperatu your receipt your based of the recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). The product is shipped at ambient temperatu your receipt your based on the ion concentration is needed for your purposes please adjust the reconstitution vulue as required (please note: the ion concentration of the final solution will vary according to the volume used). The product is shipped at ambient temperatu your receipt your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Formulation The purified protein was Lyophilized from sterile PBS (SBm Na2HPO4, 17m NaH2PO4, 68m MaCL, pH8), 5 % trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 100m GSH. Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Short Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.			
and Storage storage. Upon receipt, store it immediately at the recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). Upon receipt, store it immediately at the recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). Upon receipt, store it immediately at the recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). Upon receipt, store it immediately at the recommended temperature (see below). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (place store the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Formulation The purified protein was Lyophilized from sterile PBS (S&M Na2HPO4, 17mM NaH2PO4, 6&mM NaCL, pH8), 5 % trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 100mM GSH. Storage of Reconstituted Protein Short Term Storage: Storage at 2.8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution will serile water ad addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.	Reconstitution		
Formulation The purified protein was Lyophilized from sterile PBS (58mM Na2HPO4, 17mM NaH2PO4, 68mM NaCl, pH8.). 5 % trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 100mM GSH. Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Short Term Storage: Store at 2-8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.		 storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full 	
Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Short Term Storage: Store at 2-8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.	Purity	85%, by SDS-PAGE with Coomassie Brilliant Blue staining.	
Storage of Reconstituted Protein Short Term Storage: Store at 2-8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.	Formulation		
Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.	Stability and Storage	Store for up to 12 months at -20°C to -80°C as lyophilized powder.	
	Storage of Reconstituted Protein	Store at 2-8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal
