equal volume of glycerol for long-term storage (see Stability and Storage for more details).			
If a different concentration is needed for your purposes please			
adjust the reconstitution volume as required (please note: the			
ion concentration of the final solution will vary according to			
the volume used). Note: Centrifuge vial before opening. When reconstituting,			
gently pipet and wash down the sides of the vial to ensure full			
recovery of the protein into solution.
