	The product is shipped at ambient temperature
r reconstitution with sterile water, if glycerol has no effect ubsequent experiments, it is recommended to add an al volume of glycerol for long-term storage (see Stability Storage for more details). different concentration is needed for your purposes please isst the reconstitution volume as required (please note: the concentration of the final solution will vary according to volume used). e: Centrifuge vial before opening. When reconstituting, tly pipet and wash down the sides of the vial to ensure full overy of the protein into solution.	The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature (see below).
6, by SDS-PAGE with Coomassie Brilliant Blue staining.	
purified protein was Lyophilized from sterile PBS (58mM Na2H alose and 5 % mannitol are added as protectant before lyophil	•
e for up to 12 months at -20°C to -80°C as lyophilized powder.
