and Storage	storage.	Upon receipt, store it immediately at the recommended temperature (see below).	
	After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an		
	equal volume of glycerol for long-term storage (see Stability		
	and Storage for more details).		
	If a different concentration is needed for your purposes please		
	adjust the reconstitution volume as required (please note: the		
	ion concentration of the final solution will vary according to the volume used).		
	Note: Centrifuge vial before opening. When reconstituting,		
	gently pipet and wash down the sides of the vial to ensure full		
	recovery of the protein into solution.		
Purity	95%, by SDS-PAGE with Coomassie Brilliant Blue staining.

Formulation	The purified protein was Lyophilized from sterile PBS (58mM Na2HPO4,17mM NaH2PO4, 68mM NaCl, pH7.4). 5 % trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 300mM imidazole.
