|                          |   |   | (44-282 aa encoded by BC002728) |
|                          |   | Expression Source:  |                                 |
|                          | <i>e coli.</i> -derived, PET28a, with N-terminal 6*His.   |   |                                 |
|                          | Biological Activity:<br>Not tested  |   |                                 |
|                          |   | Endotoxin Level:  |                                 |
|                          | Please contact the lab for more information   |   |                                 |
| Reconstitution           | Reconstitution:   | Shipping:   |                                 |
| and Storage              | Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-term   | The product is shipped at ambient temperature.  |                                 |
|                          | storage.<br>After reconstitution with sterile water, if glycerol has no effect  | Upon receipt, store it immediately at the<br>recommended temperature (see below).                                       |                                 |
|                          | on subsequent experiments, it is recommended to add an  | recommended temperature (see betow).  |                                 |
|                          | equal volume of glycerol for long-term storage (see Stability and Storage for more details).  |   |                                 |
|                          | If a different concentration is needed for your purposes please   |   |                                 |
|                          | adjust the reconstitution volume as required (please note: the  |   |                                 |
|                          | ion concentration of the final solution will vary according to the volume used)   |   |                                 |
|                          | the volume used).<br>Note: Centrifuge vial before opening. When reconstituting,   |   |                                 |
|                          | gently pipet and wash down the sides of the vial to ensure full   |   |                                 |
|                          | recovery of the protein into solution.  |   |                                 |
| Purity                   | 85%, by SDS-PAGE with Coomassie Brilliant Blue staining.  |   |                                 |
| Formulation              | The purified protein was Lyophilized from sterile PBS (58mM Na2I  | HPO4,17mM NaH2PO4, 68mM NaCl, pH7.4). 5 %   |                                 |
| ronnutation              | trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 300mM imidazole.   |   |                                 |
| Stability and Storage    | Store for up to 12 months at -20°C to -80°C as lyophilized powder.  |   |                                 |
| Stability and Storage    |   |   |                                 |
| Storage of               | Short Term Storage:   |   |                                 |
| Reconstituted Protein    | Store at 2-8°C for (1-2 weeks).   |   |                                 |
| Reconstituted Protein    | Long Term Storage:<br>Aliquot and store at -20°C to -80°C for up to 3 months,   | Long Term Storage:  |                                 |
|                          | reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.   |   |                                 |
|                          |   |   |                                 |
| Selected Validation Data | 2018  |   |                                 |
|                          | $^{74}_{66}$ kBa $\rightarrow$  |   |                                 |
|                          | 3   |   |                                 |
