| Reconstitution<br>and Storage       | Reconstitution:<br>Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-term<br>storage.  | Shipping:<br>The product is shipped at ambient temperature.<br>Upon receipt, store it immediately at the<br>recommended temperature (see below).   |
|                                     | After reconstitution with sterile water, if glycerol has no effect<br>on subsequent experiments, it is recommended to add an<br>equal volume of glycerol for long-term storage (see Stability<br>and Storage for more details).                               |  |
|                                     | If a different concentration is needed for your purposes please<br>adjust the reconstitution volume as required (please note: the<br>ion concentration of the final solution will vary according to   |  |
|                                     | the volume used).<br>Note: Centrifuge vial before opening. When reconstituting,<br>gently pipet and wash down the sides of the vial to ensure full<br>recovery of the protein into solution.  |  |
| Purity                              | 80%, by SDS-PAGE with Coomassie Brilliant Blue staining.  |  |
| Formulation                         | The purified protein was Lyophilized from sterile PBS (58mM Na2HPO4, 17mM NaH2PO4, 68mM NaCl, pH8.). 5 %<br>trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 100mM GSH.                                   |  |
| Stability and Storage               | Store for up to 12 months at -20°C to -80°C as lyophilized powder.  |  |
| Storage of<br>Reconstituted Protein | Short Term Storage:<br>Store at 2-8°C for (1-2 weeks).<br>Long Term Storage:<br>Aliquot and store at -20°C to -80°C for up to 3 months,<br>reconstitution with sterile water and addition of an equal<br>volume of glycerol. Avoid repeat freeze-thaw cycles. |  |
