Note: Centrifuge vial before opening. When reconstituting genuty pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. Shopping The policity and Storage Stability and Storage Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Short ferm Storage: Storage of Reconstituted Protein Storage of Reconstituted Protein Short ferm Storage: Storage - 20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repart freeze-thaw cycles. Stelected Validation Data Storage of Reconstitution with sterile water and addition of an e		Available lyophilized	
Pure 1 WMTETLUQNANPOCKTUKALGPAATLEG Copression Source: e cali-derived, PGEX-4T, with N-terminal GST. Biological Activity: Not tested Discource: Please contact the lab for more information Reconstitution Reconstitution: Reconstitution and Storage Reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol to rougherem storage (see Stability and Storage for more dealis). Shipping: Purity 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. Shipping: Formulation The purified protein muss Lyophilized from sterile PBS (SBmM Ma2HPO4,17mM NaH2PO4, 48m MaCl, pH8), 5 Storage of Reconstituted Protein Store for up to 12 months at-20°C to -80°C as lyophilization. The elution buffer contain 100mM Storage of Reconstituted Protein Store for up to 12 months at-20°C to -80°C for up to 3 months, reconstitution of a require storage. Storage of Reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles. Storage of Reconstituted Protein Store for up to 12 months at-20°C to -80°C for up to 3 months, reconstitution of a require storage. Store af glycerol. Avoid repeat freeze-thaw cycles. Store for up to 12 months at-20°C to -80°C for up to 3 months, reconstitution of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.		pecies:	
Expression Source: e cold-identic PCEX-4T, with N-terminal GST. Biological Activity: Not tested Endotroin Level: Please contact the lab for more information Reconstitution Reconstitution and Storage Reconstitution (is subsequent experiments, its recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). The product is shipped at ambient temp to non-endotropic term storage (see Stability and Storage for more details). Purity B5%, by SDS-PAGE with Coomassie Brilliant Blue staining. The purified protein was Lyophilized from sterile PBS (SBmM Na2HPO 4, 17mM NaH2PO 4, 68m M NaCL pH8), 5 trehatose and 5 % mannitol are added as protectant before Lyophilization. The elution buffer contain 100mM Storage of Reconstitution with sterile water and addition of an equal volume of glycerol. To 70 - 80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume as a paired protein was Lyophilized from sterile PBS (SBmM Na2HPO 4, 17mM NaH2PO 4, 68m M NaCL pH8), 5 trehatose and 5 % mannitol are added as protectant before Lyophilization. The elution buffer contain 100mM Storage of Reconstituted Protein Storage: Storag		-₩V-1	
Biological Activity: Not tested Presentation Please contact the lab for more information Reconstitution and Storage Reconstitute at 0.25 µ/µ/µ in 200 µ/ sterile water for short-term storage (see Stability and Storage for more details). Stopper test immediately at the information with sterile water, if glycerol has no effect on absequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). Stopper test immediately at the recommended temperature (see below) Purity Romanitation Resonate the final solution with sterile water in the sides of the vial to ensure full recovery of the protein into solution. Stopper test immediately at the recommended temperature (see below) Purity Romanitation Stop 29-PAGE with Coomassie Brilllant Blue staining. The purified protein was Lyophilized from sterile PBS (SBmM Na2HPO4, 15mM NaH2PO4, 68mM NaCL, pH8), 5 the balose and 5 % mannitat are added as protectant before Lyophilization. The elution buffer contain 100mM Stability and Storage Store for up to 12 months at -20°C to -80°C as Lyophilized powder. Storage of Reconstitution vith sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles. Storage of Reconstitution addition with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles. Stopper term Storage Mique and storage Storage of Reconstituted Protein Migue and storage at 20°C for up to 5 months,		Expression Source:	-
Not tested Please contact the lab for more information Reconstitution and Storage Reconstitution 200 µl sterile water for short-term storage. Storage of a different concentration with sterile water, if glycerol has no effect on subsequent experimens; it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration with sterile water, if glycerol has no effect on subsequent experimens; it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration with sterile water for short-term to concentration of the final solution will vary according to the volume assequine used). If a different concentration on the storage (see Stability and Storage for more details). If a different concentration on the storage (see Stability and Storage for more details). If a different concentration on the storage (see Stability and Storage for more details). If a different concentration on the storage (see Stability and Storage and Storage Store for up protein into solution. Purity 85% by SDS-PAGE with Coomassie Brilliant Blue staining. The purified protein was Lyophilized from sterile PBS (SBMM Na2HPO4, 17mM NaH2PO4, 68mM NaCl, pH8), 5 treatione and 5 % mannitol are added as protectant before Lyophilizaton. The elution buffer contain 100mM Storage of Reconstituted Protein Store for up to 12 months at -20°C to -80°C as Lyophilized powder. Storage of Reconstituted Protein Store for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid		<i>e coli.</i> -derived, PGEX-4T, with N-terminal GST.	(133-363 aa encoded by NP_057850)
Please contact the lab for more information Reconstitution and Storage Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-tems torage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used).
