experiments, it is recommended to add an fglycerol for long-term storage (see Stability more details). Incentration is needed for your purposes please stitution volume as required (please note: the store of the final solution will vary according to d). It is a vial before opening. When reconstituting, by wash down the sides of the vial to ensure full protein into solution.
GE with Coomassie Brilliant Blue staining.
tein was Lyophilized from sterile PBS (58mM Na2HPO4,17mM NaH2PO4, 68mM NaCl, pH7.4). 5 % % mannitol are added as protectant before lyophilization. The elution buffer contain 300mM
2 months at -20°C to -80°C as lyophilized powder.
age: r (1-2 weeks). ge: e at -20°C to -80°C for up to 3 months, rith sterile water and addition of an equal rol. Avoid repeat freeze-thaw cycles.

-32 kDa

28 kDa
