For Research Use Only

CoraLite® Plus 488-conjugated ATG5 Polyclonal antibody

Catalog Number: CL488-10181

Featured Product

Basic Information

Catalog Number: GenBank Accession Number:

CL488-10181 BC002699 GeneID (NCBI): 100ul , Concentration: 1000 $\mu g/ml$ by 9474

Nanodrop: **UNIPROT ID:** Q9H1Y0 Rabbit

Isotype: ATG5 autophagy related 5 homolog

Full Name:

(S. cerevisiae) IgG Immunogen Catalog Number: Calculated MW: AG0214 32 kDa

Observed MW:

32 kDa, 40-45 kDa, 50-55 kDa

Purification Method: Antigen affinity purification Excitation/Emission maxima

wavelengths: 493 nm / 522 nm

Applications

Tested Applications:

Species Specificity: human, mouse, rat

Background Information

ATG5, also named as APG5L and ASP, belongs to the ATG5 family. It is required for autophagy. It plays an important role in the apoptotic process, possibly within the modified cytoskeleton. Its expression is a relatively late event in the apoptotic process, occurring downstream of caspase activity. Autophagy is a catabolic process for the autophagosomic-lysosomal degradation of bulk cytoplasmic contents. Formation of the autophagosome involves a ubiquitin-like conjugation system in which Atg12 is covalently bound to Atg5 and targeted to autophagosome vesicles. It mediates autophagosome-independent host protection. This antibody is raised against 28-275 amino acids of human ATG5. It can recognize the ATG5-ATG12 complex (55 kDa) which can be truncated and generate a 40-45 kDa band. 10181-2-AP also recognizes the free ATG5 (32 kDa).

Storage

Store at -20°C. Avoid exposure to light.

Storage Buffer

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data
