For Research Use Only

CoraLite® Plus 488-conjugated transgelin/SM22 Polyclonal antibody

Catalog Number: CL488-10493

Featured Product

Basic Information

Catalog Number: GenBank Accession Number:

CL488-10493 BC004927 GeneID (NCBI):

100ul , Concentration: 1000 $\mu g/ml$ by 6876 Nanodrop: **UNIPROT ID:** Q01995 Rabbit Full Name: Isotype: transgelin

IgG Calculated MW: Immunogen Catalog Number: 22 kDa

AG0764 Observed MW: 19-22 kDa

Recommended Dilutions: IF-P 1:50-1:500

Antigen affinity purification

Purification Method:

Excitation/Emission maxima wavelengths: 493 nm / 522 nm

Applications

Tested Applications:

Species Specificity: human, mouse, rat

Positive Controls:

IF-P: mouse heart tissue,

Background Information

The transgelin family is a group of proteins that belong to 22kd actin-related calponin superfamily. Of all three isoforms, transgelin 1 is the best characterized. Transgelin 1, also known as SM22alpha, is a specific marker for differentiated smooth muscle cells. Transgelin 2, also known as SM22 beta, is expressed by both smooth muscle and non-smooth muscle cells in a temporally and spatially regulated pattern. Trangenlin 3, also known as NP25, is only found in highly differentiated neuronal cells. This antibody was generated against full length transgelin 1 protein. It can cross-react with other two transgelins based on the sequence similarity.

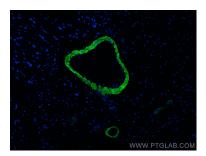

Storage

Store at -20°C. Avoid exposure to light.

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed paraffin-embedded mouse heart tissue using CoraLite® Plus 488 transgelin/SM22 antibody (CL488-10493) at dilution of 1:200. Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
