## CoraLite® Plus 488-conjugated Neuropeptide Y Polyclonal antibody

www.ptglab.com

Catalog Number: CL488-12833

**Basic Information** 

Catalog Number: GenBank Accession Number:

97 aa, 11 kDa

CL488-12833 BC029497 GeneID (NCBI):

100ul, Concentration: 1000 ug/ml by 4852 Nanodrop: UNIPROT ID: P01303 Rabbit Full Name: Isotype: neuropeptide Y IgG Calculated MW:

Immunogen Catalog Number: AG3568

**Purification Method:** Antigen affinity purification Recommended Dilutions:

IF-P 1:50-1:500

Excitation/Emission maxima

wavelengths: 493 nm / 522 nm

**Applications** 

**Tested Applications:** 

Species Specificity: human, mouse, rat

Positive Controls:

IF-P: mouse eye tissue,

## **Background Information**

Neuropeptide Y (NPY) is one of the most abundant peptides in the mammalian central nervous system (CNS). NPY has been linked to several physiological and pathological functions, such as feeding behaviour, memory processing, pain, anxiety, cell proliferation and many other processes in the central and peripheral nervous systems. The neuropeptide functions through G protein-coupled receptors to inhibit adenylyl cyclase, activate mitogen-activated protein kinase (MAPK), regulate intracellular calcium levels, and activate potassium channels. In addition, NPY was suggested as a potential neuroprotective agent in Alzheimer's disease by counteracting the toxic effect of  $\beta$ amyloid in an in vitro model.

Storage

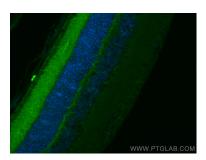

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

in USA), or 1(312) 455-8498 (outside USA)

## Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed mouse eye tissue using Coralite® Plus 488 Neuropeptide Y antibody (CL488-12833) at dilution of 1:200.
