For Research Use Only

CoraLite® Plus 488-conjugated PARP1 Polyclonal antibody

Purification Method:

IF/ICC 1:50-1:500

wavelengths:

493 nm / 522 nm

Antigen affinity purification

Excitation/Emission maxima

Recommended Dilutions:

Catalog Number: CL488-13371

Featured Product

Basic Information

Catalog Number: GenBank Accession Number:

CL488-13371 BC037545 GeneID (NCBI):

100ul, Concentration: 1000 ug/ml by 142

Nanodrop: **UNIPROT ID:** P09874

Rabbit Full Name:

Isotype: poly (ADP-ribose) polymerase 1

IgG Calculated MW: Immunogen Catalog Number: 1014 aa, 113 kDa AG4193 Observed MW:

113-116 kDa, 89 kDa

Applications

Tested Applications: IF/ICC, FC (Intra) Species Specificity:

human, mouse, rat

Positive Controls:

IF/ICC: HepG2 cells,

Background Information

PARP1 (poly(ADP-ribose) polymerase 1) is a nuclear enzyme catalyzing the poly(ADP-ribosyl)ation of many key proteins in vivo. The normal function of PARP1 is the routine repair of DNA damage. Activated by DNA strand breaks, the PARP1 is cleaved into an 85 to 89-kDa COOH-terminal fragment and a 24-kDa NH2-terminal peptide by caspases during the apoptotic process. The appearance of PARP fragments is commonly considered as an important biomarker of apoptosis. In addition to caspases, other proteases like calpains, cathepsins, granzymes and matrix metalloproteinases (MMPs) have also been reported to cleave PARP1 and gave rise to fragments ranging from 42-89-kDa. This antibody was generated against the C-terminal region of human PARP1 and it recognizes the fulllength as well as the cleavage of the PARP1.

Storage

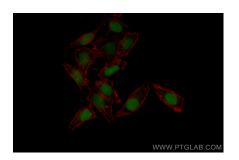

Storage:

Store at -20°C. Avoid exposure to light. Stable for one year after shipment. Storage Buffer

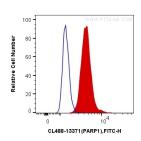

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

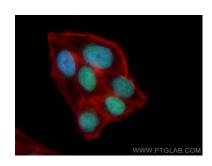

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed HepG2 cells using CoraLite® Plus 488 PARP1 antibody (CL488-13371) at dilution of 1:200.

1X10^6 K-562 cells were intracellularly stained with 0.2 ug Coralite® Plus 488 Anti-Human PARP1 (CL488-13371) (red), or 0.2 ug Control Antibody. Cells were fixed and permeabilized with Transcription Factor Staining Buffer Kit (PF00011).

Immunofluorescent analysis of (4% PFA) fixed HepG2 cells using Coralite® Plus 488 PARP1 antibody (CL488-13371) at dilution of 1:200, CL594-Phalloidin (red).
