Background Information

IQGAP1 is a member of a family of scaffolding proteins that interact with signaling and structural molecules. It $localizes\ to\ sites\ of\ cell-cell\ contact\ in\ epithelial\ cells\ and\ regulates\ distinct\ cellular\ processes\ including\ cell$ adhesion, cell migration, extracellular signals through interacting with numerous protein. Multiple studies have shown that IQGAP1 is up-regulated in many human malignancies, such as lung cancer, ovarian cancer, colon cancer, breast cancer, melanoma and HCC. And IQGAP1 plays a critical role in cancer cell invasion.
