For Research Use Only

CoraLite® Plus 488-conjugated AMH Polyclonal antibody

www.ptglab.com

Purification Method:

wavelengths:

493 nm / 522 nm

Excitation/Emission maxima

Catalog Number: CL488-23479

Basic Information

Catalog Number: GenBank Accession Number:

CL488-23479 Antigen affinity purification BC049194 GeneID (NCBI): Recommended Dilutions:

100ul, Concentration: 1000 µg/ml by 268 IF 1:50-1:500

Source: anti-Mullerian hormone Rabbit Calculated MW:

Isotype: 59 kDa

IgG

Immunogen Catalog Number:

Applications

Tested Applications:

Species Specificity: human, rat, mouse

Positive Controls:

IF: mouse ovary tissue,

Background Information

Anti-Müllerian hormone (AMH), also called Müllerian-inhibiting substance (MIS), is a dimeric glycoprotein and a member of the TGF- β family. AMH, produced by the Sertoli cells of the fetal testis, induces the regression of the Müllerian ducts, the anlagen of the female reproductive tract. However, after birth, this sex-dimorphic expression pattern is lost and AMH is also expressed in granulosa cells of growing follicles in the ovary. More recently, AMH has been studied for its role in ovarian folliculogenesis and as a potential marker of ovarian reserve.

Storage

Storage:

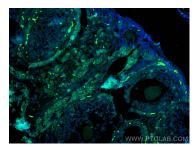

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

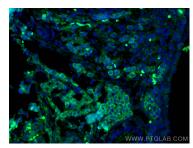

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed mouse ovary tissue using Coralite® Plus 488 AMH antibody (CL488-23479) at dilution of 1:200.

Immunofluorescent analysis of (4% PFA) fixed mouse ovary tissue using CoraLite® Plus 488 AMH antibody (CL488-23479) at dilution of 1:200.
