

For Research Use Only

CoraLite® Plus 488-conjugated HA tag Polyclonal antibody

Catalog Number: CL488-51064

Basic Information

Catalog Number: CL488-51064	GenBank Accession Number: GeneID (NCBI):	Purification Method: Antigen affinity purification
Size: 100ul , Concentration: 1000 µg/ml by Nanodrop;	Full Name: Calculated MW: 1 kDa	Recommended Dilutions: IF 1:50-1:500
Source: Rabbit		
Isotype: IgG		

Applications

Tested Applications: IF	Positive Controls: IF : Transfected HEK-293 cells,
Species Specificity: recombinant protein	

Background Information

Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. The HA tag is corresponds to amino acid residues YPYDVPDYA of human influenza virus hemagglutinin(HA). Many recombinant proteins have been engineered to express the HA tag, which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein. This tag facilitates the detection, isolation, and purification of the proteins. The HA tag is useful in western blotting and immunohistochemical localization of expressed fusion proteins when examined with antibodies raised specifically against the HA-tag.

Storage

Storage:
Store at -20°C. Avoid exposure to light. Stable for one year after shipment.
Storage Buffer:
PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.
Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Immunofluorescent analysis of (-20°C Ethanol) fixed Transfected HEK-293 cells using CoraLite® Plus 488 HA tag antibody (CL488-51064) at dilution of 1:200.
