For Research Use Only

CoraLite® Plus 488-conjugated Alpha Antichymotrypsin Monoclonal antibody

Catalog Number: CL488-66078

Basic Information

Catalog Number: GenBank Accession Number: CL488-66078 BC010530

GeneID (NCBI): 100ul, Concentration: 1000 µg/ml by 12 3F2F10

Source serpin peptidase inhibitor, clade A IF 1:50-1:500

(alpha-1 antiproteinase, antitrypsin), Excitation/Emission maxima Mouse

Isotype: Calculated MW: lgG2b 448 aa, 48 kDa Immunogen Catalog Number: Observed MW:

60 kDa

Applications

Purification Method: Protein A purification

CloneNo.:

Recommended Dilutions:

wavelengths: 488 nm / 515 nm

Tested Applications:

Species Specificity:

human

Positive Controls:

IF: human tonsillitis tissue,

Background Information

Human SerpinA3, also known as Alpha 1-antichymotrypsin (AACT), is a member of the serine protease inhibitor class, and is a plasma alpha globulin glycoprotein which increases in the blood during the inflammatory process. SerpinA3, is also an inhibitor of neutrophil cathepsin G, mast cell chymases and pancreatic chymotrypsin. SerpinA3 is produced primarily in the liver, and is identified as an acute-phase inflammatory protein. SerpinA3 deficiency has been associated with liver disease. SerpinA3 has also been implicated in the pathology of a number of devastating human diseases including chronic obstructive pulmonary disease (COPD), Parkinson's disease (PD), Alzheimer's disease (AD), Stroke, Cystic Fibrosis, Cerebral Haemorrhage and Multiple System Atrophy.

Storage

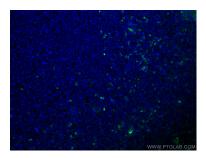

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed human tonsillitis tissue using CL488-66078 (alpha 1 Antichymotrypsin antibody) at dilution of 1:50.
