For Research Use Only

CoraLite® Plus 488-conjugated POMC Monoclonal antibody

Purification Method:

Recommended Dilutions:

Catalog Number: CL488-66358

1 Publications

Basic Information

Catalog Number: GenBank Accession Number: CL488-66358 BC065832

Protein G purification GeneID (NCBI): CloneNo.: 3C12C7

100ul, Concentration: 1000 µg/ml by 5443

Source: IF 1:50-1:500 proopiomelanocortin Mouse

Calculated MW: Excitation/Emission maxima 267 aa, 29 kDa wavelengths: Isotype: 493 nm / 522 nm lgG1

Immunogen Catalog Number:

AG17311

Applications

Tested Applications:

Cited Applications:

Species Specificity: human, rat, mouse Cited Species:

Positive Controls:

IF: HeLa cells,

Background Information

Pro-opiomelanocortin (POMC) is a prohormone that encodes multiple smaller peptide hormones within its structure. POMC plays important roles in many pathological and physiological processes, including regulating energy metabolism, immune reactions, and sexual functions. POMC expression differs quantitatively and qualitatively among most normal tissues. The large molecule of POMC is the source of several important biologically active substances. POMC can be cleaved enzymatically into the following peptides: d NPP, γ -MSH, ACTH, α -MSH, CLIP, Lipotropin β , Lipotropin γ , β -MSH, β endorphin and Met-enkephalin.

Storage

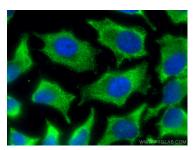

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

Selected Validation Data

Immunofluorescent analysis of (-20°C Ethanol) fixed HeLa cells using CoraLite® Plus 488 POMC antibody (CL488-66358, Clone: 3C12C7) at dilution of 1:200.
