For Research Use Only

CoraLite® Plus 488-conjugated Geminin Recombinant antibody

Catalog Number:CL488-84199-2

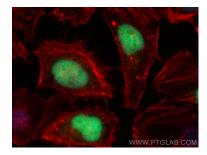

Basic Information	Catalog Number: CL488-84199-2	GenBank Accession Number: BC005185	Purification Method: Protein A purification				
	Size: 100ul , Concentration: 1000 ug/ml by Nanodrop; Source: Rabbit Isotype: IgG Immunogen Catalog Number: AG1076	GeneID (NCBI): 51053 UNIPROT ID: 075496 Full Name: geminin, DNA replication inhibitor Calculated MW: 24 kDa Observed MW: 28-29 kDa	CloneNo.: 240835B5 Recommended Dilutions: IF/ICC 1:50-1:500 Excitation/Emission maxima wavelengths: 493 nm / 522 nm				
				Applications	Tested Applications: IF/ICC Species Specificity: human	Positive Controls: IF/ICC : HeLa cells,	
				Background Information	GMNN, also designated geminin, contains 212 amino acids and has a destruction box sequence (RRTLKVIQP). GMNN participates in inhibiting DNA replication by preventing the incorporation of MCM complex into the pre-replication complex (pre-RC). It is degraded during the metaphase-anaphase transition of cell cycle's mitotic phase, which permits replication in the succeeding cell cycle. GMNN has a broad sedimentation profile ranging from about 25 kDa to 90 kDa, with a major peak at 30 kDa. Scanning of the signals shows that discrete peaks corresponding to the apparent mass of 42.5 kDa and 66 kDa are present. The dimer of geminin(50 kDa) can also be detected. (PMID: 15313623)		
					Storage:	t. Stable for one year after shipment.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed HeLa cells using Coralite® Plus 488 Geminin antibody (CL488-84199-2, Clone: 240835B5) at dilution of 1:200, CL594-Phalloidin (red).
