For Research Use Only

CoraLite® Plus 488-conjugated TXNDC5 Recombinant monoclonal antibody

Catalog Number:

Catalog Number: CL488-84756-5

Basic Information

GenBank Accession Number:

CL488-84756-5 BC001199 GeneID (NCBI):

100ul, Concentration: 1000 ug/ml by 81567

Nanodrop: **UNIPROT ID:** Q8NBS9

Rabbit Full Name:

Isotype: thioredoxin domain containing 5

(endoplasmic reticulum) IgG

Immunogen Catalog Number: Calculated MW: 432 aa, 48 kDa AG13965

> Observed MW: 48 kDa

Applications

Tested Applications:

Species Specificity:

Purification Method:

Protein A purification

CloneNo.: 242195G7

Recommended Dilutions:

IF/ICC: 1:50-1:500

Excitation/Emission maxima

wavelengths: 493 nm / 522 nm

Background Information

TXNDC5, or Thioredoxin Domain Containing 5, is a protein-coding gene that plays a significant role in cellular processes, particularly in the endoplasmic reticulum (ER). This gene is essential for the proper functioning of the cellular environment, primarily through its involvement in the formation and rearrangement of disulfide bonds within proteins. Disulfide bonds are crucial for the stability and functionality of many proteins, and TXNDC5 facilitates these processes through its thioredoxin domains, which contain enzymatic activities that promote correct protein folding and maturation in the ER. Recent studies highlight the expression characteristics of TXNDC5 across various diseases. It has been implicated in the promotion of malignant diseases, suggesting a potential role in cancer biology and other pathological conditions. (PMID:25526565; 38629066)

Positive Controls:

IF/ICC: U2OS cells,

Storage

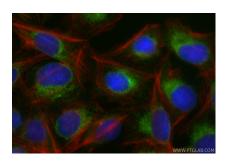

Storage:

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 50% glycerol, 0.05% Proclin300, 0.5% BSA, pH7.3

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed U2OS cells using Coralite® Plus 488 TXNDC5 antibody (CL488-84756-5, Clone: 242195G7) at dilution of 1:200, CL594-phalloidin (red).
