For Research Use Only

CoraLite®555-conjugated C1QBP Polyclonal antibody

Catalog Number: CL555-24474

Featured Product

Basic Information

Catalog Number: GenBank Accession Number: CL555-24474 BC013731

ize: GeneID (NCBI):

100ul, Concentration: 1000 µg/ml by 708

Nanodrop; Full Name:

Source: complement component 1, q
Rabbit subcomponent binding protein

Isotype: Calculated MW:
IgG 282 aa, 31 kDa
Immunogen Catalog Number: Observed MW:
AG19773 32 kDa

IF

Species Specificity: human, mouse, rat

Tested Applications:

Purification Method: Antigen affinity purification Recommended Dilutions:

IF 1:50-1:500

Excitation/Emission maxima wavelengths: 555 nm / 570 nm

Background Information

Applications

C1QBP, also named as gC1q receptor (gC1qR), p32, p33, and hyaluronan-binding protein 1 (HABP1), is a protein initially copurified with splicing factor SF2 (PMID: 1830244). The protein is synthesized as a pro-protein of 282 amino acids (aa) that is post-translationally processed by removal of the initial 73 aa to a mature protein of 209 aa (PMID: 8262387). C1QBP is an evolutionary conserved and ubiquitously expressed multifunctional protein and has been reported to be a predominantly mitochondrial matrix protein involved in inflammation and infection processes, mitochondrial ribosome biogenesis, regulation of apoptosis and nuclear transcription, and pre-mRNA splicing (PMID: 28942965).

Positive Controls: IF: NIH/3T3 cells,

Storage

Storage:

Store at -20°C. Avoid exposure to light.

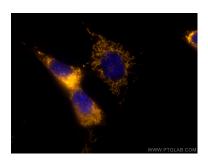

Storage Buffer:

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed NIH/3T3 cells using Coralite®555 C1QBP antibody (CL555-24474) at dilution of 1:100.
