For Research Use Only

## CoraLite®594 Anti-Mouse PLVAP (MECA-32)

Catalog Number: CL594-65214

**Basic Information** 

**Applications** 

Catalog Number:

CL594-65214

100 $\mathrm{ug}$  , 0.5  $\mathrm{mg/ml}$ 

Source: Rat Isotype:

IgG2a, kappa

**Tested Applications:** 

Species Specificity:

Mouse

**Purification Method:** Protein A purification

> CloneNo.: MECA-32

Excitation/Emission maxima

wavelengths: 588 nm / 604 nm

**Background Information** 

Plasmalemma vesicle-associated protein (PLVAP), also known as PV-1, PAL-E and MECA-32 antigen, is an endothelial cell-specific type II membrane N-glycosylated glycoprotein with a molecular weight of approximately 50-65 kDa, that forms homodimers in situ (PMID: 7626790; 30231925). The MECA-32 antibody, derived from rats  $immunized\ with\ murine\ lymph\ node\ stroma,\ shows\ high\ specificity\ for\ mouse\ endothelium\ in\ both\ embryonic\ and\ shows\ high\ specificity\ for\ mouse\ endothelium\ in\ both\ embryonic\ and\ shows\ high\ specificity\ for\ mouse\ endothelium\ in\ both\ embryonic\ and\ shows\ high\ specificity\ for\ mouse\ endothelium\ in\ both\ embryonic\ and\ shows\ high\ specificity\ for\ mouse\ endothelium\ in\ both\ embryonic\ and\ shows\ high\ specificity\ for\ mouse\ endothelium\ in\ both\ embryonic\ and\ shows\ high\ specificity\ for\ mouse\ endothelium\ in\ both\ embryonic\ and\ shows\ high\ specificity\ for\ mouse\ endothelium\ in\ both\ embryonic\ and\ shows\ high\ specificity\ for\ mouse\ endothelium\ in\ both\ embryonic\ and\ shows\ high\ specificity\ for\ mouse\ endothelium\ in\ both\ embryonic\ and\ shows\ high\ specificity\ for\ mouse\ endothelium\ shows\ high\ specificity\ shows\ high\ shows\ high\$ mature tissues (PMID: 2683264; 7626790). It recognizes most endothelial cells in the embryonic and in the adult mouse, with the exception of the brain, skeletal, and cardiac muscle, where the MECA-32 antigen has a more restricted distribution. In skeletal and cardiac muscle only small arterioles and venules express the MECA-32  $antigen, while in the \ brain its \ expression is \ negatively \ correlated \ with \ the \ differentiation \ of \ the \ vasculature \ to \ form$ the blood brain barrier (PMID: 7626790).

GenBank Accession Number:

plasmalemma vesicle associated

BC013517

Full Name:

84094

GeneID (NCBI):

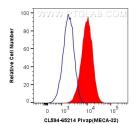

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 0.1% sodium azide and 0.5% BSA, pH 7.3.

## Selected Validation Data

1X10^6 bEnd.3 cells were surface stained with 1 ug Coralite®594 Anti-Mouse Plvap (CL594-65214, Clone:MECA-32) (red), or 1 ug Isotype Control. Cells were not fixed.
