

For Research Use Only

CoraLite® Plus 647-conjugated Cortactin Polyclonal antibody

Catalog Number:CL647-11381

Basic Information

Catalog Number: CL647-11381	GenBank Accession Number: BC008799	Purification Method: Antigen affinity purification
Size: 100ul , Concentration: 1000 µg/mL by Nanodrop;	GeneID (NCBI): 2017	Excitation/Emission maxima wavelengths: 654 nm / 674 nm
Source: Rabbit	Full Name: cortactin	
Isotype: IgG	Calculated MW: 57 kDa	
Immunogen Catalog Number: AG1940	Observed MW: 80 kDa, 85 kDa	

Applications

Tested Applications:
FC (Intra)

Species Specificity:
human, mouse, rat

Background Information

Cortactin, encoded by CTTN gene (formerly EMS1), was originally identified as a substrate of the Src kinase. It is a cytoskeletal protein that interacts with F-actin and Arp2/3 complex and plays an important role in regulation of actin assembly and cytoskeleton dynamics. Overexpression of cortactin increases cell migration, and is thought to contribute to the invasive phenotype of breast cancer and several other tumors. Three isoforms of cortactin exist due to the alternative splicing. Although cortactin has a predicted molecular weight around 65 kDa, it was detected as 80/85 doublet or as multiple bands between 75 and 85 kDa on SDS-PAGE (PMID: 18607838, 19089942).

Storage

Storage:
Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:
PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1X10⁶ HeLa cells were intracellularly stained with 0.2 ug Coralite® Plus 647 Anti-Human Cortactin (CL647-11381) (red), or 0.2 ug isotype control (blue). Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).
