

CoraLite® Plus 647-conjugated Arginase-1 Polyclonal antibody

Catalog Number: **CL647-16001**

Basic Information

Catalog Number:

CL647-16001

GenBank Accession Number:

BC005321

Purification Method:

Antigen affinity purification

Size:

100ul , Concentration: 1000 µg/ml by Nanodrop;

GeneID (NCBI):

383

Excitation/Emission maxima wavelengths:

654 nm / 674 nm

Source:

Rabbit

UNIPROT ID:

P05089

Full Name:

arginase, liver

Isotype:

IgG

Calculated MW:

236aa, 25 kDa; 322aa, 35 kDa

Immunogen Catalog Number:

AG8595

Observed MW:

35-36 kDa

Applications

Tested Applications:**Species Specificity:**

human, mouse, rat

Background Information

Arginase-1 (Liver arginase) belongs to the arginase family. ARG1 is a novel immunohistochemical marker of hepatocellular differentiation in fine needle aspiration cytology and a marker of hepatocytes and hepatocellular neoplasms. ARG1 is closely associated with alternative macrophage activation and ARG1 has been shown to protect motor neurons from trophic factor deprivation and allow sensory neurons to overcome neurite outgrowth inhibition by myelin proteins (PMID: 20071539, PMID:12098359). It can exist as a homotrimer and it has 3 isoforms produced by alternative splicing (PMID:16141327). Defects in ARG1 are the cause of argininemia (ARGIN). Deletion or TNF-mediated restriction of ARG1 unleashes the production of NO by NOS2, which is critical for pathogen control (PMID:27117406). ARG1 mainly expresses in neurons in a normal brain. The expression of ARG1 increases in microglia/macrophages and astrocytes early after CNS injuries. ARG1 has been regarded as a marker for beneficial microglia/macrophages and possesses antiinflammatory and tissue repair properties under various pathological conditions (PMID: 26538310, PMID: 31619589).

Storage

Storage:

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage
