For Research Use Only

CoraLite® Plus 647-conjugated FOXO1 Polyclonal antibody

www.ptglab.com

Catalog Number: CL647-18592

Featured Product

1 Publications

Basic Information

Catalog Number:

GenBank Accession Number:

CL647-18592 BC021981 GeneID (NCBI):

Size: 100ul , Concentration: 1000 $\mu g/ml$ by 2308

Nanodrop; **UNIPROT ID:**

Source Rabbit

Full Name: forkhead box O1 Isotype IgG Calculated MW: Immunogen Catalog Number: 655 aa, 70 kDa

AG13296 Observed MW:

70-80 kDa

Q12778

Purification Method:

Antigen affinity purification

Excitation/Emission maxima

wavelengths: 654 nm / 674 nm

Applications

Species Specificity: human, mouse, rat Cited Species:

Tested Applications:

mouse

Background Information

FOXO1, also named as FOXO1A, FKHR and FKH1, is a member of the FOXO subfamily of Forkhead transcription factors. FOXO1 is a transcription factor which acts as a regulator of cell responses to oxidative stress. FOXO1 interacts with LRPPRC and SIRT1. In the presence of KIRT1, FOXO1 mediates down-regulation of cyclin D1 and upregulation of CDKN1B levels which are required for cell transition from proliferative growth to quiescence. FOXO1 contains three predicted protein kinase B phosphorylation sites (Thr-24, Ser-256, and Ser-319) that are conserved in $other FOXO\ proteins.\ The\ t (2;13)\ and\ the\ variant\ t (1;13)\ translocations\ generate\ PAX3/FKHR\ and\ PAX7/FKHR\ fusion$ proteins respectively. The resulting protein is a transcriptional activator. Defects in FOXO1 are a cause of rhabdomyosarcoma type 2 (RMS2).

Storage

Storage:

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage
