For Research Use Only

CoraLite® Plus 647 Anti-Mouse IL-4 (11B11)

Catalog Number: CL647-65074

Basic Information

Catalog Number:

CL647-65074

ize:

100ug, 0.5 mg/ml Source:

Rat Isotype: IgG1 GenBank Accession Number:

BC027514 GeneID (NCBI):

16189

Full Name: interleukin 4

Purification Method: Affinity purification

CloneNo.: 11B11

Excitation/Emission maxima

wavelengths: 650 nm / 665 nm

Applications

Tested Applications:

FC (Intra)

Species Specificity:

Mouse

Background Information

Interleukin-4 (IL-4), a member of the a-helical cytokine family, is produced by activated CD4+ T cells, basophils, and mast cells. It promotes the proliferation and differentiation of antigen presenting cells. IL-4 also plays a pivotal role in antibody isotype switching and stimulates the production of IgE. This cytokine has been applied in the treatment of autoimmune disorder like multiple myeloma, cancer, psoriasis, and arthritis. IL-4 has also been extensively applied to inhibit detrimental effect of Th1. It may promote the growth of epithelial tumors by mediating increased proliferation and survival. (PMID: 24489573;3049907;21663408)

Storage

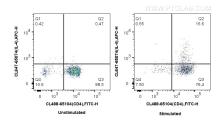

Storage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

torage Buffer

PBS with 0.1% sodium azide and 0.5% BSA, pH 7.3.

Selected Validation Data

1X10^6 unstimulated or PMA and ionomycin stimulated (in the presence of protein transport inhibitors) mouse Th2-polarized splenocytes were surface stained with 0.25 ug Coralite488 Anti-Mouse CD4 (GK1.5) (CL488-65104, Clone: GK1.5). Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C), and then intracellularly stained with 0.25 ug Coralite® Plus 647 Anti-Mouse IL-4 (CL647-65074, Clone: 11B11).
