

For Research Use Only

CoraLite® Plus 647 Anti-Human PD-1/CD279 (J110)

Catalog Number: CL647-65119

Basic Information

Catalog Number:

CL647-65119

Size:

100 tests, 5 µl/test

Source:

Mouse

Isotype:

IgG1

GenBank Accession Number:

BC074740

GeneID (NCBI):

5133

Full Name:

programmed cell death 1

Calculated MW:

288 aa, 32 kDa

Purification Method:

Affinity purification

CloneNo.:

J110

Recommended Dilutions:

FC: 5 µl per 10⁶ cells in 100 µl suspension

Excitation/Emission maxima wavelengths:

654 nm / 674 nm

Applications

Tested Applications:

FC

Species Specificity:

Human

Positive Controls:

FC : human peripheral blood lymphocytes,

Background Information

Programmed cell death 1 (PD-1, also known as CD279) is an immunoinhibitory receptor that belongs to the CD28/CTLA-4 subfamily of the Ig superfamily. It is a 288 amino acid (aa) type I transmembrane protein composed of one Ig superfamily domain, a stalk, a transmembrane domain, and an intracellular domain containing an immunoreceptor tyrosine-based inhibitory motif (ITIM) as well as an immunoreceptor tyrosine-based switch motif (ITSM) (PMID: 18173375). PD-1 is expressed during thymic development and is induced in a variety of hematopoietic cells in the periphery by antigen receptor signaling and cytokines (PMID: 20636820). Engagement of PD-1 by its ligands PD-L1 or PD-L2 transduces a signal that inhibits T-cell proliferation, cytokine production, and cytolytic function (PMID: 19426218). It is critical for the regulation of T cell function during immunity and tolerance. Blockade of PD-1 can overcome immune resistance and also has been shown to have antitumor activity (PMID: 22658127; 23169436).

Storage

Storage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 0.09% sodium azide and 0.5% BSA, pH7.3

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1X10⁶ PHA-stimulated (5 µg/mL, overnight) human peripheral blood lymphocytes were surface stained with 5.00 µl CoraLite® Plus 647-conjugated Anti-Human PD-1/CD279 (CL647-65119, Clone: J110) and FITC Anti-Human CD3 (FITC-65151, Clone: UCHT1). Cells were not fixed.

1X10⁶ human peripheral blood lymphocytes were surface stained with 5.00 µl CoraLite® Plus 647-conjugated Anti-Human PD-1/CD279 (CL647-65119, Clone: J110) and FITC Anti-Human CD3 (FITC-65151, Clone: UCHT1). Cells were not fixed.
