For Research Use Only

CoraLite® Plus 647 Anti-Human CD155/PVR (SKII.4) Mouse IgG2a Recombinant Antibody

Catalog Number: CL647-65632

Basic Information

Catalog Number:

CL647-65632

100tests, 5 ul/test

Source: Mouse

Isotype: IgG2a

45 kDa

BC015542

Full Name:

5817

GeneID (NCBI):

poliovirus receptor

Calculated MW:

GenBank Accession Number:

Purification Method:

Protein A purification

CloneNo.: SKII.4

Excitation/Emission maxima

wavelengths: 654 nm / 674 nm

Applications

Tested Applications:

Species Specificity:

human

Background Information

CD155, also known as PVR, is a type I transmembrane glycoprotein in the immunoglobulin superfamily. It contains the immunoglobulin superfamily is a containst the immunoglobulin superfamily of the containst the immunoglobulin superfamily. It contains the immunoglobulin superfamily is a contain the immunoglobulin superfamily. It contains the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily. It contains the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily. It contains the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the immunoglobulin superfamily is a contain the immunoglobulin superfamily in the imthree extracellular immunoglobulin-like domains, D1-D3, of which D1 is recognized by the virus. Mature human CD155 consists of a 323 amino acid extracellular domain with one N-terminal V-type and two C2-type Ig-like domains, a 24 amino acid transmembrane segment, and a 50 amino acid cytoplasmic tail. CD155 is thought to play a role in adhesion by interaction with the ECM component vitronectin as well as a role in NK killing of tumor cells. CD155 binds to two receptors of NK cells, CD96 and CD226, and accumulates at cell-cell contact sites, leading to the formation of mature immune synapses between NK cells and target cells. CD155 serves as the entry receptor for poliovirus and thereby mediates human susceptibility to poliovirus infection.

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 0.09% sodium azide and 0.5% BSA.

in USA), or 1(312) 455-8498 (outside USA)

Selected Validation Data

1x10^6 human PBMCs were surface stained with 5 ul CoraLite® Plus 647 Anti-Human CD155/PVR (SKII.4) Mouse IgG2a RecAb (CL647-65632, Clone:SKII.4) (right), or CoraLite® Plus 647 Mouse IgG2a Isotype Control (C1.18.4) (CL647-65208, Clone: C1.18.4) (left). Cells were incubated with FC Receptor Block prior to staining. Cells were not fixed.

1x10^6 human PBMCs were surface stained with 5 ul Coralite® Plus 647 Anti-Human CD155/PVR (SKII.4) Mouse IgG2a RecAb (CL647-65632, Clone:SKII.4) (red), or Coralite® Plus 647 Mouse IgG2a Isotype Control (C1.18.4) (CL647-65208, Clone: C1.18.4) (blue). Cells were incubated with FC Receptor Block prior to staining. Cells were not
