For Research Use Only

## CoraLite® Plus 647 Anti-Mouse PLVAP (MECA-32) Rat IgG2a Recombinant Antibody

Catalog Number: CL647-65664

**Basic Information** 

Catalog Number: CL647-65664

100ug , 500 ug/ml

Source:

Isotype: lgG2a

GenBank Accession Number:

BC013517 GeneID (NCBI): 84094

Full Name:

plasmalemma vesicle associated

protein

**Purification Method:** 

Protein G purification

CloneNo.: MECA-32

Recommended Dilutions:

FC: 0.25 ug per 10^6 cells in a 100  $\mu$ l

suspension

Excitation/Emission maxima

wavelengths: 654 nm / 674 nm

**Applications** 

**Tested Applications:** 

Species Specificity:

mouse

Positive Controls:

FC: bEnd.3 cells.

## **Background Information**

Plasmalemma vesicle-associated protein (PLVAP), also known as PV-1, PAL-E and MECA-32 antigen, is an endothelial cell-specific type II membrane N-glycosylated glycoprotein with a molecular weight of approximately 50-65 kDa, that forms homodimers in situ (PMID: 7626790; 30231925). The MECA-32 antibody, derived from rats immunized with murine lymph node stroma, shows high specificity for mouse endothelium in both embryonic and mature tissues (PMID: 2683264; 7626790). It recognizes most endothelial cells in the embryonic and in the adult mouse, with the exception of the brain, skeletal, and cardiac muscle, where the MECA-32 antigen has a more restricted distribution. In skeletal and cardiac muscle only small arterioles and venules express the MECA-32 antigen, while in the brain its expression is negatively correlated with the differentiation of the vasculature to form the blood brain barrier (PMID: 7626790).

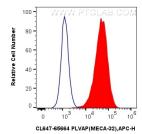

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer

PBS with 0.09% sodium azide, pH7.3

## Selected Validation Data

1x10^6 bEnd.3 cells were surface stained with 0.25 ug CoraLite® Plus 647 Anti-Mouse PLVAP (MECA-32) Rat IgG2a RecAb (CL647-65664, Clone: MECA-32) (red) or CoraLite® Plus 647 Rat IgG2a Isotype Control (2A3) (CL647-65209, Clone: 2A3) (blue). Cells were not fixed.
