For Research Use Only

CoraLite® Plus 647 Anti-Human CD80 Rabbit Recombinant Antibody

Catalog Number: CL647-98384

Basic Information

Catalog Number:

100tests, 5 ul/test

Size:

CL647-98384

NM_005191 GeneID (NCBI):

GenBank Accession Number:

Calculated MW:

UNIPROT ID: Source:

Rabbit P33681 Full Name: Isotype: CD80 molecule

33 kDa

Purification Method: Protein A purification

CloneNo.:

242913B11 Excitation/Emission maxima

wavelengths: 654 nm / 674 nm

Applications

Tested Applications:

Immunogen Catalog Number:

Species Specificity:

human

Background Information

CD80 (also known as B7-1) is a type I membrane protein that is a member of the immunoglobulin superfamily, with an extracellular immunoglobulin constant-like domain and a variable-like domain required for receptor binding. It is expressed on antigen-presenting cells (APCs), including B cells, dendritic cells, monocytes, and macrophages. CD80 is the receptor for the proteins CD28 and CTLA-4 found on the surface of T-cells. It is involved in the $costimulatory\ signal\ essential\ for\ T-lymphocyte\ activation.\ T-cell\ proliferation\ and\ cytokine\ production\ is\ induced$ by the binding of CD28, binding to CTLA-4 has opposite effects and inhibits T-cell activation. CD80 also acts as a cellular attachment receptor for adenovirus subgroup B. (PMID: 7545666; 12015893; 16920215)

Storage

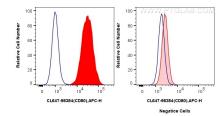

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 0.09% sodium azide and 0.5% BSA, pH7.3

in USA), or 1(312) 455-8498 (outside USA)

Selected Validation Data

1x10^6 Raji (left) or HUVEC cells (right) were surface stained with 5 ul Coralite® Plus 647 Anti-Human CD80 Rabbit RecAb (CL647-98384, Clone: 242913B11) (red) or Coralite® Plus 647 Rabbit IgG Isotype Control RecAb (CL647-98136, Clone: 240953C9) (blue). Cells were not fixed.
