Background Information

This product is an isotype control antibody, which is used to estimate the non-specific binding of target primary antibodies due to Fc receptor binding or other protein-protein interactions. An isotype control antibody should have the same immunoglobulin type and be used at the same concentration as the test antibody.

Selected Validation Data

1x10^6 human PBMCs were surface stained with 0.25 ug Coralite® 700 Rabbit lgG lsotype Control RecAb (CL700-98136, Clone: 240953C9) (red in histogram), or 0.25 ug Coralite® 700 Anti-Human CD4 Rabbit Recombinant Antibody (CL700-98042, Clone: 240427E12) (green in histogram), or unstained (blue in histogram). Cells were incubated with FC Receptor Block prior to staining. Cells were not fixed.
