For Research Use Only

CoraLite® Plus 750-conjugated Alpha Tubulin Recombinant antibody

Catalog Number: CL750-80762

Featured Product

Basic Information

Catalog Number: GenBank Accession Number:

CL750-80762 Protein A purification BC009314 GeneID (NCBI): CloneNo.:

100ul, Concentration: 1000 µg/ml by 10376 1G7 Recommended Dilutions:

Source: tubulin, alpha 1b Rabbit Calculated MW:

Isotype: 50 kDa Observed MW: 50-55 kDa

Immunogen Catalog Number:

Excitation/Emission maxima wavelengths:

Purification Method:

WB 1:1000-1:8000

755 nm / 780 nm

Applications

Tested Applications:

Species Specificity:

Human, mouse, rat

Positive Controls:

WB: HeLa cells, mouse brain tissue

Background Information

There are five tubulins in human cells: alpha, beta, gamma, delta, and epsilon. Tubulins are conserved across species. They form heterodimers, which multimerize to form a microtubule filament. An alpha and beta tubulin heterodimer is the basic structural unit of microtubules. The heterodimer does not come apart once formed. The alpha and beta tubulins, which are each about 55 kDa MW, are homologous but not identical. Alpha tubulin is useful for scientists across fields as an internal control due to its high, ubiquitous expression pattern.

Storage

Storage:

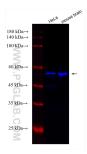

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with CL750-80762 (Alpha Tubulin antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours.
