For Research Use Only

## Cardinal Red™ Anti-Human ALCAM (3A6)

Catalog Number: CR-65223

Basic Information <sup>c</sup>

Catalog Number: CR-65223

Size:

100 tests , 5  $\mu$ l/test

Source:

Mouse Isotype:

IgG1, kappa

GenBank Accession Number:

BC057809 GeneID (NCBI):

214

Full Name:

activated leukocyte cell adhesion

nolecule

Calculated MW:

105 kDa

Purification Method: Affinity purification

CloneNo.:

3A6

Excitation/Emission maxima

wavelengths: 592 nm / 611 nm

**Applications** 

**Tested Applications:** 

FC

Species Specificity:

Human

## **Background Information**

Activated leukocyte cell adhesion molecule (ALCAM, also known as CD166) is a cell adhesion molecule that belongs to the immunoglobulin superfamily. It is involved in cell-cell adhesion through homophilic and heterophilic (to CD6) interactions. ALCAM is widely expressed in a variety of normal tissues and cell types, including activated T cells and monocytes, epithelial cells, fibroblasts, neuronal cells, hepatocytes, and bone marrow mesenchymal stem cells (PMID: 7760007; 25221999). Altered ALCAM expression has been associated with the differentiation state and progression in some neoplasms including melanoma, prostate, colorectal, and breast cancers (PMID: 20461761; 18172759).

Storage

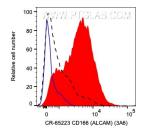

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer

PBS with 0.09% sodium azide and 0.5% BSA.

## Selected Validation Data

1X10^6 PHA-treated (day 3) human PBMCs were surface stained with 5 ul Cardinal Red™ Anti-Human ALCAM (CR-65223, Clone:3A6) (red), or unstained (blue). The black dashed line indicates unactivated PBMCs surface stained with 5 ul Cardinal Red™ Anti-Human ALCAM (CR-65223, Clone:3A6). Cells were not fixed. Monocytes were gated.
