For Research Use Only

Recombinant Mouse Bst2 protein (rFc Tag)

www.ptglab.com

Catalog Number: Eg2669

Basic Information

Species: Mouse

Purity: >90 %, SDS-PAGE

Tag: rFc Tag

Technical Specifications

Purity:
>90 %, SDS-PAGE

Endotoxin Level:
<1.0 EU/μg protein, LAL method

Source:
HEK293-derived Mouse Bst2 protein Thr52-Ser152 (Accession# Q8R2Q8) with a rabbit IgG Fc tag at the C-terminus.

GeneID:
69550

Accession:
Q8R2Q8

Predicted Molecular Mass:
37.0 kDa

SDS-PAGE:

Formulation:
Lyophilized from 0.22 μm filtered solution in PBS, pH 7.4. Normally 5% trehalose and 5% mannitol are added as protectants before lyophilization.

Biological Activity

Not tested

Storage and Shipping

Storage:
It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

- Until expiry date, -20°C to -80°C as lyophilized proteins.
- 3 months, -20°C to -80°C under sterile conditions after reconstitution.

Shipping:
The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature.

Reconstitution

Briefly centrifuge the tube before opening. Reconstitute at 0.1-0.5 mg/mL in sterile water.

Background

BST2 protein, also known as CD317, is a membrane protein involved in various biological processes. It plays a crucial role in restricting viral release, particularly for enveloped viruses like HIV-1. Additionally, BST2 is implicated in immune regulation, being involved in the function of plasmacytoid dendritic cells. In cancer biology, BST2 expression is associated with tumor progression and metastasis, making it a potential therapeutic target. Its involvement in multiple pathways highlights its significance in virology, immunology, and oncology.
