# Recombinant Human CCL14 protein (rFc Tag)

Catalog Number: Eg2879

## Basic Information

**Species:**  
Human

**Purity:**  
>90 %, SDS-PAGE

**Tag:**  
rFc Tag

## Technical Specifications

**Purity:**

>90 %, SDS-PAGE

**Endotoxin Level:**

<0.1 EU/μg protein, LAL method

**Source:**

HEK293-derived Human CCL14 protein Thr22-Asn93 (Accession# Q16627-1) with a rabbit IgG Fc tag at the C-terminus.

**GeneID:**

6358

**Accession:**

Q16627-1

**Predicted Molecular Mass:**

34.5 kDa

**SDS-PAGE:**

35-38 kDa, reducing (R) conditions

**Formulation:**

Lyophilized from 0.22 μm filtered solution in PBS, pH 7.4. Normally 5% trehalose and 5% mannitol are added as protectants before lyophilization.

## Biological Activity

Not tested

## Storage and Shipping

**Storage:**

It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

- Until expiry date, -20°C to -80°C as lyophilized proteins.
- 3 months, -20°C to -80°C under sterile conditions after reconstitution.

**Shipping:**

The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature.

## Reconstitution

Briefly centrifuge the tube before opening. Reconstitute at 0.1-0.5 mg/mL in sterile water.

## Background

CCL14, also known as HCC-1, is a human plasma chemokine that belongs to the CC chemokine family. It was originally collected and purified from the hemofiltrate of patients with chronic renal failure. CCL14 is constitutively expressed in various tissues, including the spleen, bone marrow, liver, muscle, and intestine. CCL14 serves as a novel prognostic factor and tumor suppressor of HCC by modulating cell cycle and promoting apoptosis (PMID: 31641099), and CCL14 is a potential biomarker associated with immune cell infiltration in lung adenocarcinoma (PMID: 39030403).

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

Purity of Recombinant Human CCL14 was determined by SDS-PAGE. The protein was resolved in an SDS-PAGE in reducing (R) and non-reducing (NR) conditions and stained using Coomassie blue.
