

For Research Use Only

Recombinant Mouse Masp1 protein (rFc Tag)

Catalog Number: Eg4420

Basic Information

Species:
Mouse

Purity:
>90 %, SDS-PAGE

Tag:
C-rFc

Technical Specifications

Purity:
>90 %, SDS-PAGE

Endotoxin Level:
<0.1 EU/μg protein, LAL method

Source:
HEK293-derived Mouse Masp1 protein Arg300-Lys445 (Accession# P98064-1) with a rabbit IgG Fc tag at the C-terminus

GeneID:
17174

Accession:
P98064-1

Predicted Molecular Mass:
42.2 kDa

SDS-PAGE:
45-50 kDa, reducing (R) condition

Formulation:
Lyophilized from 0.22 μm filtered solution in PBS, pH 7.4. Normally 5% trehalose and 5% mannitol are added as protectants before lyophilization.

Biological Activity

Not tested

Storage and Shipping

Storage:

It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

- Until expiry date, -20°C to -80°C as lyophilized proteins.
- 3 months, -20°C to -80°C under sterile conditions after reconstitution.

Shipping:

The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature.

Reconstitution

Briefly centrifuge the tube before opening. Reconstitute at 0.1-0.5 mg/mL in sterile water.

Background

MASP1, or MBL associated serine protease 1, encodes a serine protease that functions as a component of the lectin pathway of complement activation, which is essential for innate and adaptive immune responses. The lectin pathway becomes activated through MASP-1 autoactivation, and the activated MASP-1 is essential for the activation of MASP-2 and probably MASP-3 (PMID: 27535802). MASP-1 and thrombin effects are synergistic on clot formation (PMID: 26645987).

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Purity of Recombinant Human Masp1 was determined by SDS-PAGE. The protein was resolved in an SDS-PAGE in reducing (R) and non-reducing (NR) conditions and stained using Coomassie blue.
